

1 Section

Figure 1 shows a 4x4 grid with X and Y axes. The start cell is at (1,1) and the goal cell is at (2,2). The grid is divided into three regions: a red region (start cell and its immediate neighbors), a green region (the goal cell and its immediate neighbors), and a black region (the rest of the grid). The path from the start cell to the goal cell is highlighted in blue.
