A 2D grid with a vertical axis labeled 'Y' and values 2 and 3. The grid has 4 columns and 2 rows. The bottom row (Y=2) contains a red cell, a red cell, a red cell, and a black cell. The top row (Y=3) contains a blue cell, a blue cell, a green cell, and a black cell. A blue path starts at the bottom-left red cell, moves right to the middle red cell, then up to the middle blue cell. A green path starts at the bottom-middle red cell, moves up to the top-middle green cell.
